

Role of Native Vegetation Workshop

February 17, 2005

North Mason School District Office

9:00 AM

NOTE: This training will be given to Master Gardeners so it will be assumed that the audience will be able to identify plants but don't feel you need to know this. Our goal is to have the Master Gardeners team up with you to get re-vegetation projects completed.

Agenda

9:00 –10:00	Coastal Shoreline Geology– Hugh Shipman, State Department of Ecology
10:00-1200	Role of Native Vegetation – Elliott Menashe, Greenbelt Consulting, http://www.greenbeltconsulting.com/
12:00 – 12:30	Lunch on way to site (bring bag lunch)
12:30 – 2:00	Site Visit with hands on planning – Elliott Menashe Lynch Cove Community Association Marine Park
2:00 – 4:00	Optional tour of Theler Wetlands

Directions:

Go to the town of Belfair and continue through Belfair town going south on Hwy 3, go up the hill and take a right at the North Mason High School sign and take the immediate right and then first left. You will see the District office on the right and parking on the left.

This workshop session has been sponsored by the Hood Canal Coordinating Council with funds from the Puget Sound Action Team.
